About

FoOom Advanced Dispensing

The team behind FoOom Advanced Dispensing has more than 25 years of experience with innovative dispensing solutions and has filed dozens of worldwide patents. The company has now taken a disruptive turn with a completely new line of ground-breaking dispensing products.

New FoOom product line

The FoOom product family is a fully modular system consisting of a wide range of pump styles, refill options and dispensers. Tuned to different liquids such as foam soap, spray soap, hair and body gel, sanitizers and disinfectants, the patented FoOom products are hygienic, require very little maintenance and can be refilled in a snap.

The different pump styles applied by FoOom are all developed and manufactured under the strictest European quality assurance procedures, resulting in the top performance and unsurpassed reliability of our pumps. The parts are exclusively mass-produced in high-investment factories.

All refills and dispensers are manufactured in advanced automated production lines in the Netherlands, assuring the highest-quality products at a very competitive price. Fooom's modular approach also offers maximum flexibility and enables a fast response to specific customer demands.

FoOom Dispenser Range

Patented modular dispensing system

The distinctive dispenser line is specifically designed for optimal user-friendliness.

This takes into account intuitive operation by the end-user, and the smart construction also allows for easy installation, service, and maintenance. Moreover, the products can be easily cleaned, ensuring safety and optimal hygiene. The product range consists of various dispenser types, including:

- Manually operated 500 ml and 1000 ml versions
- Hands-free, elbow-operated 500 ml and 1000 ml versions

All dispenser types are available in fashionable bright colors and sophisticated metalized surfaces. Our in-house workshop can further customize your dispensers with high-quality logos and full-color decorations.

BIOPROTECT

Foom's patented BioProtect® system offers additional antimicrobial protection for your dispenser, with three levels of protection available.

01 Manual dispensers

Standard dispensing system

PRODUCT DESCRIPTION & BENEFITS

High-quality wall-mounted 1000 ml & 500 ml dispensers. Developed to ensure your washrooms meet high standards of hygiene. Our soap dispensers are easy to use and load, feature single-handed push dispensing and can be customized.

- Excellent quality and a five-year warranty on dispensers
- Protection: Possibility of system protection (special lock-out)
- 100% Made in Holland
- Invisible lock system; no key needed
- Available in a variety of fresh and stylish colours

Tonka Muguet

The sweetly scented tonka bean from South America and the lily of the valley (Muguet) are combined to create a balanced, calm, and floral experience.

Almond Milk

The lovely aroma of almond and the creamy milk mingle together to create a sophisticated yet subtle almond milk scent.

Chestnut leaf

The fragrance features the renewing scent of a chestnut tree with big-toothed leaves. The aroma of green, spicy notes surprise you and diffuse its scents around you.

Fresh

Enjoy this hand foam enriched with a refreshing aquatic scent. A brand new fresh fragrance infused with the sophistication and sensuality of vetiver.

Orange Cedar

Enjoy this elegant scent of fresh sweet mandarin aroma combined with orange blossom. This aroma is enriched by warm spices and powdery musk while resting on a sensual fruity and woody base.

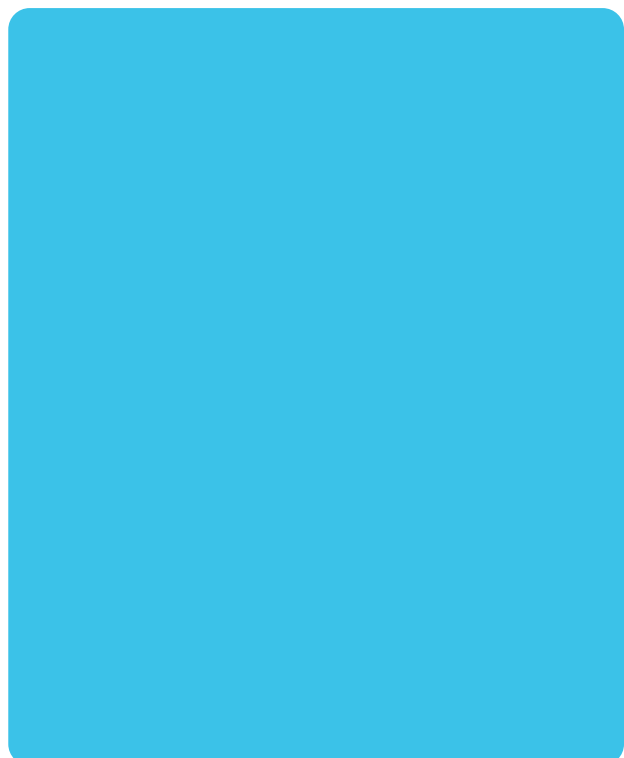

Marina blue

Enjoy a refreshing sensation. The beach is in sight. This "wave" combines the eucalyptus and patchouli for a special summery feeling. Dive into a world of lightness and coolness.

FoOom Fill & Click system

Fill it – Click it – Sell it!

FoOom produces a wide range of high-quality refills based on advanced chemical formulas.

In today's world, we need to be aware of the high amount of energy it takes to ship refills – which often have a water content of 80% or more. A more eco-friendly alternative to 'shipping water over water' is called for.

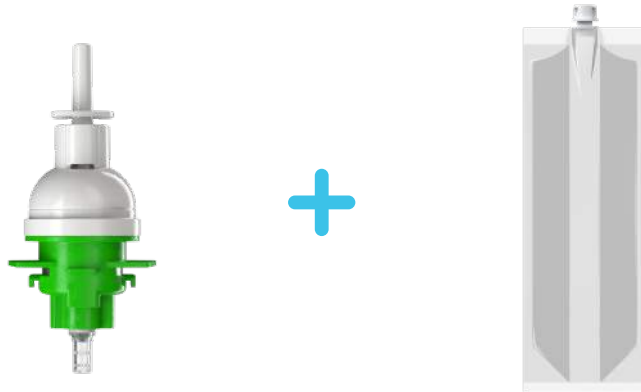

To this end, FoOom has developed the do-it-yourself Fill&Click System. This allows distributors to produce custom refills locally, based on their own high-quality formulas.

As well as transport costs being reduced substantially, there are other benefits:

- No import duties or time-consuming paperwork related to the import of liquids
- On-demand production of refills minimizes valuable stock
- Attractive opportunities for the local job market
- Lower transport emissions, so less taxing on the environment

Most economical soap dispenser system in the world

Make your own refill locally **FoOom fill station**

The FoOom fill station has been specifically developed for dosing and pumping liquid products like your own manufactured soap.

This compact filling machine is designed for small to medium production. The FoOom fill station works alongside our dispensing system and will allow you to refill empty FoOom bags locally with FoOom Granulate bags or your own liquids of choice.

The machine allows for an effective workflow with an enormous range of settings to enable you to set precise dosages.

The fill station is easy to handle and will allow you to create up to 4 refills a minute with one operator (± 300.00 a year).

- No Silver, no heavy metals and no nanomaterials

- Enhanced polymers, not a coating

- No migration and degeneration !

- Safe for the environment

07

FoOom Bio-protect

FoOom Dispenser with revolutionary Antimicrobial protection

Sustainable and 100% safe for the food and healthcare sector.

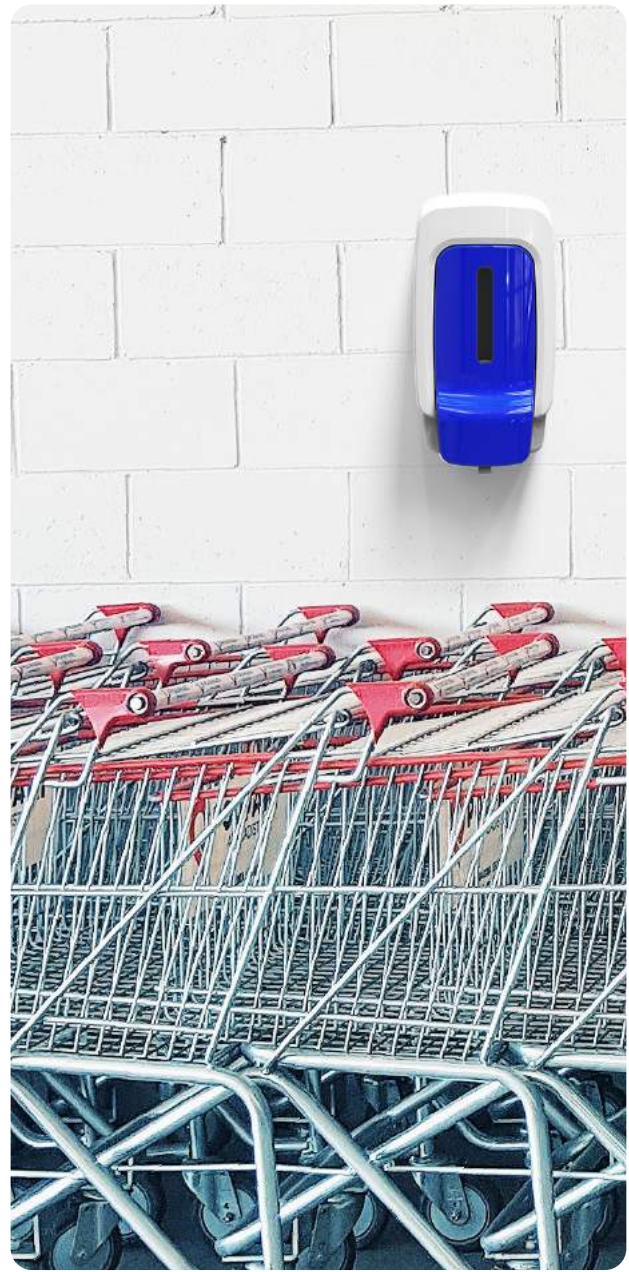

Lifelong antimicrobial protection effectiveness of 99% and more measured according to ISO22196/JIS Z2801

Today's antibacterial technologies make use of heavy metals, nano-materials and other harmful chemicals. And roughly all these technologies migrate.

They have a substance that leaches out of the plastic or polymer to kill bacteria but... these substances may also end up on your food, in the environment, in our oceans and in your body.

And with the rise of antibiotic resistant bacteria the use of these methods become an imminent concern.

08
Customize

Customize your product

We will personalize your product!

All FoOom dispenser types are available in fashionable bright colors, sophisticated metalized surfaces and handle colors of your choice. Our in-house workshop can further customize your dispensers with high-quality logos, text and full-color decorations.

The FoOom workshop uses a unique printing method to decorate your dispensers. It applies chemical-resistant inks protecting the coating from wear and fading, resulting in vivid decorations that will last for the dispenser's lifetime.

FoOom custom-printed dispensers enhance your washroom and strengthen your corporate identity

We can print anything, in any quantity!

- 100% Customizable logo printing
- Different logos per print run
